

**Recommendation of Dr. Randoll's treatment
from Dr. Masaru Emoto, May 2009.**

Every time I visit Munich, Germany, Dr. Randoll gives me a treatment.

As a matter of fact, I have been suffering the interruption in the circulation in my legs due to diabetes for more than 30 years. Only after 500 meters of walk, my left leg starts to ache, and I could not walk any longer.

Yet, in the year 2008, I had the chance to receive Dr. Randoll's treatment three times at his clinic, and my situation has improved dramatically since then.

Dr. Randoll has studied about the importance of water in a living system very deeply, and he recognizes that it is much more crucial to transfer the correct information to the water both inside and outside the cells than to pay attention to each symptom.

This idea is the same as mine, which I have been telling to the people for many years all over the world. From the bottom of my heart, I recommend Dr. Randoll's treatment, which has been developed by Dr. Randoll based on his profound philosophy and experience on water.
